OBJECTIVE

I am a french second-year computer science student. **Specialized in backend**, I can make efficient and working functionnalities. **Perservering** against difficulties I always find a way to make it, howerver i don't stay stuck too long and don't hesitate to ask for help when needed. I am looking for a **web developer internship**

WORK EXPERIENCE

Tobacco shop "Le memphis" - Bellignat, France
Full stack web developper
(September 2021 - Present)

- University team project for a real company, creation of a website from scratch with vueJS and Laravel.
- Click&Collect and showcase website creation for a tobacco shop
- The website allows users to see a products list currently sold at the tobacco shop, where they can order them and afterward collect them on spot
- Developped under a **REST** architecture using **VueJS** and **Laravel**

MJC Les Clarines - Viuz-En-Sallaz, France
Organizer
(April 2015 - April 2020)

Organizer during an event at a local public cultural center grouping board games, video games and some tournaments

- Volunteering
- **Creation** and **organization** of the event
- Staff during the day of the event
- Organizer of a tournament

EDUCATION

IUT - Annecy-Le-Vieux, France
DUT Informatique
(September 2020 - July 2022)

2-year university diploma in computer-science where we made some different projects :

- Fnac : University project based on the framework **Laravel** where we recreated some of the Fnac website's functionnalities
- Asylum : Unity based team project, making a 3D game in 1 week. Using **C#**.
- Demactu : Team project where we created a blog website on tech news in 1 week using **HTML**, **CSS**, **PHP** and **JS**.
- CLoFan : Team project where we created a 2D game in 1 week using **SFML**, **C++**

Charles Poncet Secondary School - Cluses, France
Baccalauréat Scientifique spécialité Sciences de l'Ingénieur
(September 2017 - September 2020)

High school diploma specialized in science and computer engineering with honors
